**23/04/2018** - Please note this agreement has been extended to **31/03/2019**

### SCOPE

The Portable Appliance (PAT) and Fixed Wire (FWT) Testing Framework Agreement is split into four Lots, please see a breakdown below:

Lot 1: PAT in England, Wales & Northern Ireland  
 Lot 2: FWT in England, Wales & Northern Ireland  
 Lot 3: PAT in Scotland  
 Lot 4: FWT in Scotland

### AGREEMENT BENEFITS

- o Savings are generated by harnessing the buying power of all the participating consortia members. The Framework Agreement provides an average saving of 12.5% when compared to the previous separate PAT and FWT Framework Agreements;
- o A multi Supplier Framework Agreement will ensure that Suppliers remain competitive through the life of the Framework Agreement;
- o Members have a quicker OJEU complaint access to the market and the Framework Agreement removes the need to conduct an OJEU tender. Members can Call-Off from the Framework Agreement through Direct Award or Further Competition saving considerable resources and thus providing savings to members in terms of tendering costs of £6,000; and
- o The Framework Agreement is ERDF compliant, allowing members to utilise the Framework Agreement for their ERDF projects.

## USING THE FRAMEWORK

The ITQ must state the weightings to be applied to the evaluation, and the evaluation methodology to be used. In line with this Framework Agreement, the following criteria should be used, no additional technical criteria can be added.

Award Criteria	Weighting
Price	70%
Operational Plan	9%
Order, Delivery and Invoicing	3%
Start-up and Value Added Services	6%
Technical Support	12%

## SUPPLIERS

Lot	Suppliers
