Janet(UK) working closely with a set of Anchor Tenants
have set up a single Supplier framework agreement for the
detailed design, supply, installation, configuration,
commissioning and maintenance of a co-location
datacentre facility with power, cooling and shared facilities
including security.

The framework agreement enables the long-term utilisation
of the datacentre environment for a range of activities
including:
High performance computing (HPC) systems with high
power requirements but moderate availability requirements
Administration, teaching and learning systems with
moderate power requirements but high availability
requirements
Other research systems that may have a requirement for
higher levels of data confidentiality, and to operate in an
NHS/Higher Education secure research zone.
