Please see attached document (Contact Details by Agreement) for further details in regards to the contacts.

Please note there is currently an outstanding unresolved query between NWUPC and Illumina regarding pricing for consumables under the framework for Gene Expression. When the previous pricing held on HEC was due to be reviewed, Illumina confirmed they would hold this pricing further until 31st Aug 2018. It has since become apparent this was an error at illumina's end. Their standard non framework pricing increased and their intention should have been to increase the framework pricing inline with the discount structure off their standard pricing. Jane Edwards is currently trying to resolve this. Please note no new pricing has been agreed at this stage from that currently uploaded to HEC with an expiry date of 31st Aug 2018.
