The purpose of the DPS is to support institutions by providing systems that enable the deposit, publishing, sharing, discovery, access and citation of research related digital objects with differing file formats and sizes. The main outputs will be Journal articles, theses and research data. The repositories will contain both public (open) and restricted (closed) outputs and outputs that are under embargo to a certain date. They will hold information about authors and contributors and their projects for example author name, department, projects, publications, contact details, collaborators. This information will be made public by the repository.
